

Driven by **AI**,
Powered by **Innovation**,
Focused on **You**

Data & AI | Product Engineering |
Intelligent Automation | Quality Engineering

Who We Are: AI-Driven.Customer-Focused. Future-Ready.

Indium is an AI-driven digital engineering company that helps enterprises build, scale, and innovate with cutting-edge technology. We specialize in custom solutions, ensuring every engagement is tailored to business needs with a relentless customer-first approach. Our expertise spans Generative AI, Product Engineering, Intelligent Automation, Data & AI, Quality Engineering, and Gaming, delivering high-impact solutions that drive real business impact.

With 5000+ associates globally, and **backed by EQT** (one of the largest PE's in the world) - we partner with Fortune 500, Global 2000, and leading technology firms across Financial Services, Healthcare, Manufacturing, Retail, and Technology—driving impact in North America, India, the UK, Singapore, Australia, and Japan to keep businesses ahead in an AI-first world.

The Numbers Behind our Success

Indium's agentic AI platform that reduces technical debt drastically

What teams usually struggle with

Modernization initiatives slow down when teams contend with systems they do not fully understand. Hidden dependencies, undocumented logic, and data context loss accumulate **technical debt**. Over time, every new change forces teams to pay a growing **reverse engineering tax**.

The Lifter addresses this gap by establishing system clarity before change begins.

The Lifter approach

The Lifter makes existing systems understandable early.

It maps how code behaves, how data is actually used, and what tests truly validate. This allows teams to plan and modernize with clarity instead of assumptions.

The Lifter solution suite

Legacy Lifter

Reduces code archaeology by one third, giving developers more time to build instead of reverse engineering systems.

Data Lifter

Preserves business meaning during migration by retaining data context, not just schemas.

Test Lifter

Aligns testing outcomes with real system behavior, improving confidence beyond coverage metrics.

What this unlocks for your team

Problems surface in **Weeks, not Months**

6-12 months of manual archaeology compressed into weeks

1/3rd of developer time reclaimed from understanding legacy code

Shared system understanding replaces tribal knowledge

Modernization decisions **driven by evidence**, not guesswork

The outcome

Your teams spend less time understanding the past and more time building what comes next. System knowledge is established early, reducing rework and late-stage surprises.

Subsidiaries

Indium acquired **Experion Technologies**, a Global Product Engineering Company. This acquisition enhances Indium's capabilities across Product Strategy, Engineering, Cognitive Computing, Platform Engineering & Experience Design.

iXie is the gaming division of Indium. **iXie Gaming** is an end-to-end gaming services company that provides holistic services across the game development lifecycle, using world-class tools and technology.

Partners

Analyst & Industry Recognition

Recognized as a **Major Contender** for **Data & AI services** in the Everest group's Peak Matrix Assessment 2025 for the 2nd consecutive year

Indium Recognized as a **High Achiever** in Nelson-Hall's **NEAT Assessment** on Quality Engineering Services, 2025.

Indium wins the 2025 **OnCon Icon Awards** as one of the **Top 100 Data & Analytics Teams**

Recognized as a **Leader** in the PeMa quadrant for **Generative AI services** 2024.

Indium wins the 2025 **Brandon Hall Awards** for overall **excellence** in **L&D** and **GenAI Learning**.

Recognized as a **Product Challenger** by **ISG Provider Lens** in the **Data & AI Report 2024**

How We Make Technology Work for You

AI-Driven

We harness the power of AI to help enterprises innovate smarter, faster, and with greater precision. It's not just technology—it's transformation at its finest.

High Value

Our customer-first approach ensures every solution delivers maximum impact. We don't just meet expectations; we exceed them with tailored solutions.

Innovation

By questioning the status quo, we unlock new possibilities and redefine what's achievable. Innovation is our DNA, driving continuous improvement and bold ideas.

Next-Gen

We craft future-ready solutions that keep businesses ahead of the curve. From Generative AI to Low-Code Development, we engineer what's next, today.
